

ANYWHERE PORTAL

Provision, manage and support your customers all in one single portal.

Welcome to Anywhere Portal. The single space that houses all the solutions that you have with Evolve IP. Making it as easy as possible for you to manage your customers and services. The Anywhere Portal gives you the ability to build and configure all BroadWorks services, allowing you to add customers to detailed configurations easily. There are many benefits to Anywhere Portal, to make it easy for you, we have listed the solution highlights and features below.

SOLUTION HIGHLIGHTS

Full Webex Integration: Check the email is available for Webex use and then provision the full seat by simply enabling the correct service pack.

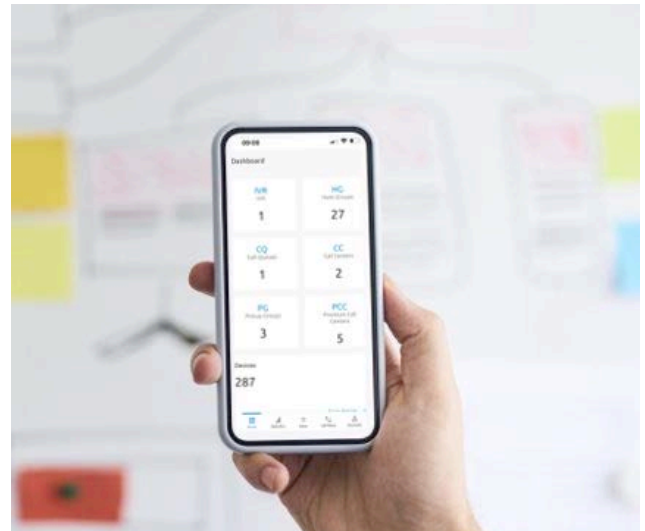

Password Reset for Customers: Remove the need for your service desk to reset passwords, with our new self-service tool. Or use this to provision users, just provide them a link and they can set their own passwords.

Multi-Factor-Authentication: Providing a secure way for admins to access and use the tool, all via the Evolve IP tool, ClearLogin.

Bulk upload to build users: Provide the name, service pack phone number, extension and let the portal do the hard work. It will simply email you when they are all built.

Hierarchy of All Customers: One portal to manage all customers, full hierarchy of all your clients from one login, manage them all from the same portal with the same credentials.

Business Insights: User and Group level reporting within the same portal. Providing basic reporting for all users, with the one portal, no need to swap to AKIXI Lite for basic reporting needs.

FEATURE LIST

New UI, fast, clean and mobile interface on desktop
Build the correct seat with the correct Webex version
One click to build the SCA - No more custom credentials
Password Reset for customers
Auto addition of handsets to redirect servers
Bulk upload of more than 50 users
One portal for provisioning and administrators
Single Login for all enterprises and service providers
Comprehensive reporting and business analytics
